Generated from your prompt

How to make an emoji with the AI emoji generator

Three steps to a custom emoji with the AI emoji generator, from a blank prompt to a set for your server.

1

Describe your emoji

Write the character, the expression, and the colors — for example, a round orange cat with heart eyes, or a green frog giving a thumbs-up. The more specific the prompt, the closer the emoji comes to what you pictured.

2

Pick a model and generate

Choose GPT Image 2 or Nano Banana 2 in the AI emoji generator, then generate. Each generation spends credits, so you sign in first and every run stays intentional.

3

Refine by re-prompting

Close but not quite? Adjust the expression or palette in your prompt and generate again until the emoji fits your community.
